

Modifying Acquisitions Practices (MAP) Pilot

Alternative access options for select 2019 Springer articles

Overview for Library Users

Beginning in 2019, the library is piloting alternative access options for a small subset of journal articles, as outlined in the Library's Strategic Priorities 2018-19 to 2020-21. The pilot is guided by the results of [Queen's Journal Usage Project](#) and the high-value journals identified by the Queen's community. We will continue to consult with faculty and students in evaluating alternative access models to journal articles, and more flexible acquisitions practices to support research and teaching at the university. For more information, please visit: <https://library.queensu.ca/about-us/planning-assessment/accountability>.

Key information about the MAP Pilot

- The library will be using Reprints Desk as a pilot for exploring alternative access options for a small subset of 2019 journal articles.
- Access to Reprints Desk is limited to specific journal titles and publication date ranges as determined by the library; you will only see the Reprints Desk option for pre-selected titles and date ranges.
- Reprints Desk has been activated in our system and you will be able to access articles through it via [Summon](#) or when you follow "Getit@Queen's" links in other databases and search tools.
- The Library pays a copyright clearance fee and an administration charge for each article you request
- The strength of Reprints Desk is in rapid fulfillment of journal article requests. You should continue to use purpose-built search and discovery tools, such as [Summon](#), to locate items of interest

EXAMPLE: ARTICLE SEARCH

Reprints Desk functions at the article level. You would begin by searching for an article in [Summon](#). For example, if you would like to access an article called “The Interplay of the Two Hemispheres of the Brain in Psychoanalysis” in the *American Journal of Psychoanalysis*, you would search for the article in Summon and then click “Full Text Online” to access it.

The screenshot shows a search results page from Queen's University Library. The search query is "INTERPLAY OF THE TWO HEMISPHERES OF THE BRAIN IN PSYCHOANALYSIS". The results are sorted by relevance, showing 51,652 results. The first result is the target article, "THE INTERPLAY OF THE TWO HEMISPHERES OF THE BRAIN IN PSYCHOANALYSIS" by Lentz, Joan Sacks. A red arrow points to the "Full Text Online" link under the "Journal Article:" field. The second result is "Phrase Length Matters: The Interplay between Implicit Prosody and Syntax in Korean 'Garden Path' Sentences" by Hwang, H.; Steinhauer, K.

When you click “Full Text Online, you are automatically brought to a **pre-filled** Reprints Desk order form. The last step is to provide your name and Queen’s University e-mail address, and then click “Place Order.”

The screenshot shows the Reprints Desk order form. The form is pre-filled with the following information:

- University Email Address (Required): [Empty]
- Patron First & Last Name (Required): [Empty]
- Publication: The American journal of psychoanalysis
- Year: 2018
- Article Title: THE INTERPLAY OF THE TWO HEMISPHERES OF THE BRAIN IN PSYCHOANALYSIS
- Author(s): Joan Sacks Lentz
- Volume: 78
- Issue: 3
- Pages: 217-230-
- ISSN/ISBN: 0002-9548
- DOI: [Empty]
- PMID: [Empty]

A red arrow points to the "Place Order" button at the bottom of the form. The right sidebar shows the article details and a "Check the library catalogue (QCAT)" link.

You will then see a confirmation screen (pictured below). The Reprints Desk system will also send you an automatically generated confirmation e-mail.
